DETAILED ACTION

Election/Restrictions

1. This application contains claims 7-10 drawn to an invention nonelected with traverse in Paper No. 12/15/04. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Objections

2. Claims 1-6 and 11-20 are objected to because of the following informalities: Throughout the claims, the feature "one or more deformable members" should be referred back to as --said one or more deformable members--. Also in many of the claims the phrase "a said" is unclear. For example, in claim 3, line 6, "one or more of said deformable members, said deformable member(s)" should be changed to --each of said one or more deformable members--

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3612

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 4-5, 11-13, 17, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Browne et al.

Browne et al. disclose the claimed energy absorption device including deformable shape memory members 14 that are selectively "tuned" to the configuration shown in Figure 1A and the configuration shown in Figure 1B by the application of heat. These two configurations inherently include different strength levels. See the description of the suitable shape memory materials beginning in column 4, lines 27-48 and continuing to column 9.

Allowable Subject Matter

5. Claims 3, 6, 14-16, 18 and 20 would be allowable if rewritten or amended to overcome the minor objections set forth in this Office action.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

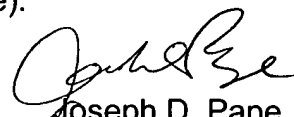

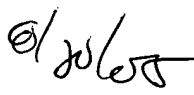

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
